

PART TWO: YOUR REFLECTION

Write down your learnings and reflections on the stories shared by the group against the HOP principles.

Write: What are your thoughts about whether the rule accurately reflects normal everyday work?

Write: Your thoughts about whether the rule could be misleading (be interpreted in different ways) or missing critical information for the work to go well?

Write: Your thoughts about how the rule could create conflicts for those having to use it and create adaption in the work.

Write: What are your thoughts about how the context of workers sharing their stories was evidenced in their behavior with you?

Write: What are your thoughts about how the organization applies the use of rules in normal everyday work compared to the workers who do the job and face the risk daily?

Write: Your thoughts about whether workers doing similar work in the same situation would have done the same things, the same way as shown in the investigation? (i.e. was this normal as part of everyday work or an unknown departure in the given situation).
